1. Select a tab associated with the configuration you wish to deploy (Exp: Price Rules)

2. Search for or select 1 or more price rules

3. Update the "Exclude Fields" section to remove specific fields from the script

4. Click "Generate"

5. Download or Copy:
   a. JSON
   b. Apex Script

- Use the JSON for reference or with your version control system to track changes over time

- Run the Apex Script to deploy or update this price rule (using an external Id) in any of your environments
